

COP 24 - Transport Events with GIZ Involvement

COP24 Transport day

Thursday, 6 Dec

9:00 – 18:00

Offsite Event – No accreditation needed

Miejski Dom Kultury

Under the theme Urban Mobility Solutions to Tackle Climate Change, Transport Day 2018 will highlight the strong role of cities in reducing greenhouse gas emissions and improving air quality by implementing measures in the transport sector. Importantly, the event will address how national governments can support the potential of cities for successful sustainable urban mobility action.

Co-organized by CIVITAS, City of Katowice, SloCat, Paris Process on Mobility and Climate

Transport Day - Break Out Session 1B: Financing Transformation & Low Carbon Mobility

Thursday, 6 Dec

11:30 – 12:45

This session covers current status and trends of climate-oriented finance in the urban transport sector (e.g. MDBs, development agencies, climate finance instruments).

Miejski Dom Kultury

This includes the historic/projected growth of emerging finance strategies (e.g. climate bonds), especially in context of rapid growth in urban transport demand. There are vast financing gaps in global transport and a need to increase financing to achieve transformation for transport to meet Paris Agreement targets.

Organized by IsDB and GIZ

Transport Day - Break Out Session 2A: Climate Action in Urban Transport

Thursday, 6 Dec

14:45 – 16:00

In this event, TUMI's scaling up of transformative urban mobility in its 2nd year will be discussed. Secondly, the MobiliseYourCity Partnership will introduce a GHG-emission quantification & targeting tool for urban transport.

Miejski Dom Kultury

Organized by TUMI and MobiliseYourCity Partnership

Global Climate Action Event - Transport

Friday, 7 Dec

15:00 – 18:00

Official Event

Lubelskie,
COP Venue

While highlighting the scale and range of climate action in the transport sector, this event identifies political, technical, social, and economic barriers, which are preventing the scaling up of climate action and examines how UNFCCC Parties can help address these barriers at the national level.

Organized by UNFCCC / Transport Group

CHANGING TRANSPORT

Facilitating climate actions in mobility

Support for Increased Ambition on Low-Carbon Transport and Development

Friday, 8 Dec
09:00 – 10:00

The session will focus on the challenges facing the private sector in financing renewable energy in developing countries especially in IsDB member countries and take a look at transport in NDC, presented by GIZ.

MDB Pavilion

Organised by IsDB

EUROCLIMA+ in action:

Promoting sustainable urban mobility together with local actors in Latin America

Saturday, 8 Dec
10:30

EU Side Event

**Room Brussels,
EU Pavilion**

Latin America is among the world's most urbanised regions, with 80% of the population living in cities and the share set to reach to 86% by 2050. Urban transport has been a sector showing a continued rise in greenhouse gas emissions, but with good potential for decreasing them.

Organized by European Commission – DEVCO G2 and European Commission

MYC Event

Saturday, 8 Dec
13:30 – 15:00

French Side Event

French Pavilion

From COP23 to COP24: A year of action for MobiliseYourCity Partnership. This event includes a presentation of the latest news about the partnership. Additionally, the latest MYC publication about National Urban Mobility Policies and Investment Programs (NUMP) will be presented.

Organized by MobiliseYourCity Partnership

Mobility transition in our cities: Prioritising people - decarbonising transport

Saturday, 8 Dec
17:30 – 19:00

TUMI Side Event

German Pavilion

Brought together by the Transformative Urban Mobility Initiative (TUMI), this side event will present examples from emerging and developing countries to showcase and discuss creative ways to bring about a mobility transition, including the use of intelligent urban planning, innovative vehicles, new tariff schemes and the power of cooperation across city and national borders.

Organized by TUMI

A matter of urgency: How to get transportation on a fast track to decarbonization?

Monday, 10 Dec
17:30 – 19:00

BMU Event

German Pavilion

Agora Verkehrswende will present an update of the 2017 published G20 decarbonisation study that was conducted jointly with GIZ. The study contains a detailed breakdown for each G20 country, presenting both the impact of its transport sector and the climate goals and practical measures it has adopted to address this impact.

[Agora Verkehrswende - Towards Decarbonising Transport](#)

Organized by BMU

CHANGING TRANSPORT

Facilitating climate actions in mobility

GHG baselines and monitoring methodologies and tools to support MRV at national level

Wednesday, 12 Dec

13:15 – 14:45

Official Side Event

Room 5

The aim of this side event is to share with interested stakeholders information on the development of a compendium of tools and best practices that developing countries may find useful to analyze the GHG impact of their mitigation options. GIZ will present on the Transport Volume of the compendium and experiences with quantifying emissions in the transport sector.

Passenger and Freight Transport Volume

Organized by UNFCCC

Decarbonisation of EU Transport - long term strategy

Thursday, 13 Dec

10:30 – 12:00

EU Side Event

Room Brussels,
EU Pavilion

Wuppertal Institute will present a guideline document on National Urban Mobility Programmes as part of MobiliseYourCity.

Organized by Transport&Environment, Öko-Institut, UN Habitat and Wuppertal Institute

CHANGING TRANSPORT

Facilitating climate actions in mobility

To change transport towards a sustainable pathway we work with an international team of 100 experts with a current project portfolio of 110 million Euros in around 25 projects in 30 countries. We promote sustainable transport worldwide to harness societal benefits, such as access to jobs, clean air and economic development, to improve quality of life and to fight climate change. We offer training and consulting services and connect transport colleagues from around the world. Our expertise covers choosing the right measures to mitigate carbon emissions, facilitating access to finance them and monitoring the results.
