

Outlook: Supporting countries in preparing zero carbon transport policies

Stephen Dräxler | Advisor | GIZ
EST Forum Pre-Event | 12 October 2021

Countries in Asia work on long-term, integrated strategies to decarbonize transport.

Outcome

IV. Regional & Global

I. China

II. India

**NDC
TRANSPORT
INITIATIVE
FOR ASIA**

III. Vietnam

Council for
Decarbonising
Transport in Asia

Consulting two further
countries in Asia

Impact

GHG emissions from transport in Asia peak earlier and at a lower level

Component I: China

-  Co-control strategy & stakeholder platform in a province
-  Climate & pollutant emissions strategies

Component II: India

-  Stakeholder platform on national level
-  Improved deployment framework for e-mobility

Component III: Vietnam

-  Enhanced NDC and systems for monitoring and reporting
-  Clean transport policies: e-mobility, urban mobility, & fuel economy

Component IV: Regional & global

-  Regional agenda setting with strong link to climate agenda
-  Knowledge management
-  Experience sharing on international level
-  Knowledge transfer from and to Germany, US and EU

 Lessons learned

 Transformational change

Reimagining a sustainable future of transport

Supporting countries in preparing zero carbon transport policies

- Applying foresight methodology
- Engaging Members of the Council for Decarbonising Transport

Policy / Project Preparation

Scoping

Developing background material and stakeholder mapping

1st Workshop

1st stakeholder workshop: **Vision and strategies** for zero carbon sustainable transport („foresight“) are developed with respective country

Concept definition

Post-workshop discussions – detailing next steps towards decarbonisation roadmap development

2nd Workshop

2nd stakeholder workshop: **Policy packages** for decarbonisation & next steps for roadmap development are discussed

Concept note

Concept note is drafted that enables country to develop a detailed proposal to attract (policy based) lending
